Success Stories: From Campus to Corporate

Preeti Kumari
Computer Science and Engg.

My sincere gratitude to the GPCG, Jalandhar and Placement cell for its efforts in imparting quality technical and aptitude training to us. They have left no stone unturned to ensure maximum placements offers to college students in this entire region in top corporate. Surely this is a legacy of 50 years of Academic Excellence. The most important thing I had learnt that do not give up, get success over your fear and failure. I was on cloud nine after getting placed at Wipro limited, Bangalore during my final year. I would like to say that the environment and the infrastructure provided by college are excellent. I am always grateful to the faculty members for motivating and encouraging me to empower myself.

Proud to be a part of GPCG Jalandhar family.

Kajal
Chemical Engineering

I feel very proud to be a part of GPCG, Jalandhar where I gained knowledge that gave wing to my career. Getting placed in a top MNC has always been my dream and college had helped me to realize this dream of mine. After successful completion of my diploma in Chemical Engineering, I got placed in Mahindra and Mahindra (Swaraj Division), Mohali with handsome salary package. I was the first girl of my family who went out of city for the job. I represented my company at National and International levels. The support and the motivation that I received from the faculty members and placement cell, has been extremely important in shaping me as a professional.

I extend my gratitude to our placement cell.
